## PPM target agreement

Dear Sir or Madam,

Zero-defect deliveries from your company are an important precondition that we can provide top quality parts to our customers. Therefore, quality targets have been defined in the "Management Guideline for Suppliers" (Download at: <https://www.idealautomotive.com/lieferantenportal/downloadcenter>) that you are familiar with. In this respect measures have to be developed in particular for continuous improvement and ensuring "zero-defect delivery quality".

According to from you delivered material group, we envisage the following targets for your delivery quality:

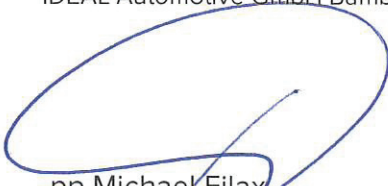

**Year of 2024 500 ppm**

On principle, the zero-defect policy has priority. We will inform you about the ppm value that you reached in the 1<sup>st</sup> half year of 2024 with our supplier rating and determine further measures.

Unless we receive your objection per mail to IA-SUPPLIERDEVELOPMENT@ideal-automotive.com until 1st. of April 2024, we will consider the ppm target agreement as accepted and confirmed.

Yours sincerely,

IDEAL Automotive GmbH Bamberg
